## EXPERIENCE

### Release Manager

Verizon | December 2012 – present

As release manager in IT security, I am responsible for ensuring the link between software developments (~200 developers) and Operation.

As a DevOps manager, Agile coach and Scrum Master, I create connection between the customers and teams of developers (~10 developers per team). I lead the developments within an Agile cycle of a few weeks.

### Standardization and Coding IT Project Manager

Bridgestone Europe | 1999 – November 2012

2007-2012 **Sales Regionalization** Project: As IT Project Manager, I am responsible for implementing the migration from countries to regions in SAP MM, FI, SD and non SAP-systems. 10 Team Leaders are involved in the project and report directly to me.

Application of PRINCE2® (Project in a controlled environment).

Cost: +/- 3 million Euros on European level.

Estimated ROI: +/- 1 million Euros per year.

Application of J-SOX (Sarbanes and Oxley) procedures in Project Management

2004-2006 **Kaname Team Leader**. "Kaname" was a project aimed at reorganizing Bridgestone Europe's logistics flows. Responsible for implementing OEM flows in SAP. Coordinating implementation go-live and cut over activities within the Pan-European sales business units.

Leading a team of 4 SAP Specialists.

### July 1999 – 2003 EDI and E-commerce Specialist

- Implementing EDI flows with Bridgestone customers and suppliers.

- Translating EDI messages and integrating these messages into SAP.

- Responsible for customers' contacts on implementation of EDI.

- EDI Monitoring, EDI-SAP Customizing, UNIX Developments

### EDI Consultant

Influe | 1996 – June 1999

Installing INFLUE EDI solutions for customers such as Norauto, Bridgestone, Henkel, Colgate, KJS, etc.

Responsible for the first line support desk (leader of a team of 6 people). cycle of a few weeks.
